Hello,

Attached are photos and the initial Technician's Report for the Spirit of Norfolk Port Main Engine Failure from 5/15/22. Let me know if you have any questions and I will work with Bay Diesel to have this problem resolved as soon as possible.

Thank you!

Good evening [REDACTED],

Thank you for the update. The duty team will be taking lead on this moving forward. Our CID has been has authorized SPIRIT OF NORFOLK to continue operating with tug assist through the weekend. Please notify the duty team immediately if anything else occurs or if a change in your operational plan needs to take place. The duty MI can be reached at [REDACTED] with any further questions or concerns.

Very Respectfully,

Hello again,

Just to update you all on where things are with the Spirit of Norfolk. After the cruise Wednesday evening, we identified significantly more smoke than should be anticipated after a repair like in kind to what was done earlier this week with the Water Pump Housing and Turbo Replacement. Bay Diesel came back out Thursday AM and we cruised with a Tug Assist on Thursday while they investigated the problem. Bay Diesel has recommended an overhaul including but not limited to Replacement of Cylinder Packs, Heads, I/B TurboCharger, and possibly Main Crankshaft Bearing depending on inspection. I would like to continue this repair throughout the weekend while cruising with a Tug Assist. We have a total of 6 cruises this weekend, and have secured the T/V Huntsman for those cruises, which is an 1800 HP Towing Vessel. Bay Diesel will be performing the work and we plan to be ready for Sea Trials either on

Wednesday 5/25 or Thursday 5/26. Please reach out to me with any questions, and as always, feel free to swing by and Inspect at any time.

Good Morning Ryan,

Our office will allow operation with Tug Assist. Please insure notification to Pilots to enable traffic mitigation if needed.

Very Respectfully,

Hello again,

Last night on our Dinner cruise I observed a significant amount of white smoke coming from the exhaust and I have Bay Diesel out right now checking out the problem. Just in case this problem is larger than a simple fix, I would like to cruise with a Tug Assist in case we do not

have the Port Main repaired prior to cruising. I have a lunch cruise and a dinner cruise today on our schedule. Let me know if this is permitted and I am available for any questions or if you would like to come inspect anytime.

Hello,

Attached are all of the Tech reports for the Port Main Engine Overhaul on the Spirit of Norfolk from the last week. Sea Trials were successful this afternoon with no problems. Let me know if you have any questions!
