Tropical Storm Beta

SET PORT CONDITION YANKEE

The latest National Weather Service (NWS) advisory for Tropical Storm Beta indicates a 40-60% chance of tropical storm force winds affecting the MSU Port Arthur Captain of the Port Zone within 24-hours. Further, due to the storm's characteristics, the southeast Texas and southwest Louisiana coasts could see a coastal storm surge of 4-6 feet.

Therefore, effective at 8:00 A.M. CDT, September 20, 2020, the Captain of the Port, Port Arthur (COTP) has **set Port Condition YANKEE** for the ports of Beaumont, TX; Port Arthur, TX; Orange, TX; Sabine, TX; and Lake Charles, LA including all tributaries and connecting waterways. Tropical storm force winds from **Tropical Storm Beta** could impact the Texas/Louisiana coast with **within 24 hours**.

The following guidance applies:

1. Cargo transfer operations must be completed before sustained winds reach gale force (34 kts / 39 mph).
2. Manned, self-propelled, oceangoing vessels moored or at anchor should be prepared to get underway immediately. The COTP should be notified of all unmanned or "dead ship" vessels within the COTP Zone.
3. Commercial vessels greater than 500 gross tons and all seagoing tugs and barges intending to remain in port must immediately notify the Captain of the Port of their intentions and submit a Remaining In Port Checklist to the Captain of the Port for approval.
 - If a Remaining in Port Checklist was submitted for Tropical Storm Marco/Hurricane Laura and the submitted information has not changed, Remaining in Port notifications may state that the Checklist submitted on (date) has not changed – no new checklist will be required.
4. Commercial vessels, **including fishing vessels**, less than 500 gross tons should plan to seek shelter north of the Neches River Intersection on the Sabine-Neches Waterway and north of the Intracoastal Waterway on the Calcasieu River.
 - No vessel shall moor or anchor in Taylor Bayou Turning Basin without permission of the Captain of the Port.

5. Dredges should begin removing equipment from the waterway and seeking sheltered moorings. All pipeline should be adequately secured or sunk to prevent it breaking loose and becoming a hazard to navigation. Notify VTS Port Arthur or the COTP to report the location of equipment and pipeline.
6. Vessels are advised to seek safe harbor in the northern reaches of the waterway. Survey places to moor or anchor to safely ride out a tropical storm or hurricane, and make available the necessary heavy weather mooring gear. **Vessels shall not moor in locations that impede the safe transit of vessels in the channel.** By regulation, vessels intending to moor at 33 CFR 105 facilities must have an agreed upon security arrangement with the facility prior to the vessels mooring.

The COTP is NOT restricting vessel movements or port operations at this time. All stakeholders are advised to monitor weather conditions closely and be prepared to suspend operations, have deep draft ships depart for sea and/or notify the COTP if remaining in port is desired.

A guide entitled "Hurricane Information for the Maritime Industry" is available to assist in planning for hurricane season. Remaining in Port Checklists are available from the Vessel Traffic Service website at <https://www.atlanticarea.uscg.mil/vtsportarthur/>, HOMEPORT (<http://homeport.uscg.mil>) or by calling the VTS Watch Supervisor at (409) 719-5070. Email completed forms to msupa-mtsru@uscg.mil (both Sabine-Neches and Calcasieu Waterways).

To ensure the safety of your vessel and crew, now is the time to plan. Vessels are advised to seek safe harbor in the northern reaches of the waterway. Survey places to moor or anchor to safely ride out a tropical storm or hurricane, and make available the necessary heavy weather mooring gear. **Vessels shall not moor in locations that impede the safe transit of vessels in the channel.** By regulation, vessels intending to moor at 33 CFR 105 facilities must have an agreed upon security arrangement with the facility prior to the vessels mooring.

The Coast Guard will issue a Broadcast Notice to Mariners and Marine Safety Information Bulletins updating Port Conditions as needed.

This notice will be posted on the Coast Guard's HOMEPORT website at <http://homeport.uscg.mil> and the VTS website at <https://www.atlanticarea.uscg.mil/vtsportarthur/>. If you have any questions regarding this notice, please call MSU Port Arthur at (409) 723-6500 or MSU Lake Charles at (337) 912-0073.
