MARINE SAFETY INFORMATION BULLETIN 045-25

SET PORT CONDITION FOUR IN THE PORTS OF JACKSONVILLE AND FERNANDINA

Port Conditions are set by the Captain of the Port (COTP) and are used to describe, generally, how prepared the port should be for severe weather. Port conditions will be changed as projected arrival of gale force winds (greater than 34 knots/39mph) associated with tropical storm activity approach the port. Mariners should be aware that there are no "safe havens" identified within the Jacksonville and Fernandina area for a vessel to safely survive hurricane force winds, or storm surges without creating a threat to the safety of the port and public welfare.
